RAILROADS WIN THEIR FIGHT FOR HIGHER FREIGHT RATES; GIVEN 5 PER CENT INCREASE

Interstate Commerce Commission Grants Long-Sought Relief.

COKE TARIFFS NOT AFFECTED

Increases Refused in Coke, Coal and Ore Rail and Water Rates Unchanged Otherwise All Increases Asked by the Carriers are Allowed

By The Associated Press

WASHINGTON, Dec. 18.—In a decision in the rate advance case the Interstate Commerce Commission today granted the railroads practically all the increases in freight rates they had asked. The decision was announced at the opening of the session of the commission this morning and was read to the assembled railroad officials by Commissioner Clark.

The decision does not include the proposed increases in rates on coke, coal and ore, which were not involved in the case. The increases granted will not be put into effect before January 1 next, it was stated.

The increases granted by the decision are in the nature of a compromise between the demands of the railroads for an increase in all rates and the contention of the shippers that no general increase should be granted.

The decision does not include the proposed increase in rates on bituminous coal, which the railroads had asked be increased 5 cents a ton. The commission held that the proposed increase had not been justified.

FRISCO TOURISTS FIND IT COLD IN COLORADO HILLS

Eager for the Warmth of the Desert States, They Write.

HAVING A SPLENDID JOURNEY

Delays Have Been Due to Slight Breakdowns, Due to Careless Driving, Which is Hard on Springs; Kansas is Praised for Its Splendid Roads.

The Connellsville automobiists who are looking for San Francisco are now in the desert states. A letter from W. F. Stamp, leader of the party, written at Las Animas, Colorado, on December 13, states that the tourists are anxious to leave the snow-capped Rockies for the warmth of the desert. Other interesting topics are discussed in the letter follows:

"We arrived here all well and O. K. I think it is about 12 o'clock. We left La Junta at Col. yesterday afternoon, one hundred nine miles. We intended stopping here for supper, but broke a spring and got traveled about five miles on it. It was hard traveling over a stretch of sand at eight, not a house or tree for fifty miles each side. Twice we had to hunt place to get through. Today we bought our water and cooking out of a filthy cistern water, and was for the purpose. We will stay here until a spring comes down here. Dandy.

"This is a fine town, population 1,500, best town of any size we left Kansas City, 800 miles. We only had 8 to Kansas City on good roads all the way to Topeka. We are now in the Rocky mountains. We will go through the Raton Pass about 10 o'clock today. It was filled with snow but men are at work clearing it out so the travelers can go through. It is only 24 miles from here. It is five above zero here and the sun shines.

"We met some people here today from Pennsylvania and got from Connellsville. At Las Animas I met a man who was sold in Connellsville. He is business on the Pittsburg & Ohio. I worked there for Pat Harrison. How is Pat? Did you see people from there? He said he was in Pittsburgh and it sounded good to hear some one say Edinburg & Ohio.

"We had some port yesterday afternoon but got plenty dry. We saw hundreds of them on the old Santa Fe trail, looking like mules when they run of their long ears. They appeared very wild. We suppose you much of Idaho June, the weather 10 degrees. We came 8 miles of the Independence [illegible] but the mud was too deep to travel [illegible] lot of people went to see him when he was sick. We called to Jesse Jones Jr. at Kansas City. He is one of the runners outlaw.

"Nothing happens we will be in New Mexico by Thursday [illegible] where we left Connellsville. Dandy [illegible] but we are having little [illegible] for the long hole on [illegible] but that I [illegible] trouble. We have had for [illegible] we left home. We [illegible] Mr. [illegible] had them to shoot her [illegible] we reshipped them to some Fe. The ones we have on the machine are in fine shape. One more day after this and we will be in the warm climate on the sand hills of New Mexico.

"It sure is a fine sight coming into a city or town out here at nights. You can see miles away, thinking all the time you will be there in a few minutes. Every town with a population of 500 or more through the states of Missouri, Kansas and Colorado has the 'great white way' and sure look nice. We had a good fourth back in a small town. In a blacksmith shop we were talking to the blacksmith and he said he knew people back in Pennsylvania. He said he knew Dr. Newcomer. He said the doctor's father-in-law lived six miles from the shop. We did not tell him the doctor is a bachelor.

"They tell us we will not have good roads only in places now till we reach the state of California. After today we will only have to go through two states till we reach California, New Mexico and Arizona. They tell us you can make all the time you wish on those roads. But will have to travel slow through the next two states, where all the danger is. We are 5,000 feet above the sea level and when we go over the Pass today we will be 8,000 feet above. We can notice the difference. All day yesterday as we were climbing up the mountains and today I noticed it more and they tell us we will still notice it more when we reach the top. You can stand here and see the mountains all covered with snow. Nothing on them but small fine trees. We paid ten, twelve and thirteen cents per gallon for gasoline all along the route till today we paid 20 cents and they say we will pay 45 in Mexico and Arizona.

"That is hard on the bank, but we must have gas. We saw big cattle ranches through this state. We had to open and shut four gates between Las Animas and here. Lots of families are seen traveling on wagons through the West, one wagon full of furniture and one wagon for the family carrying a stove to cook on and to keep them warm. Last night we saw four that had stopped for the night. The cattle and horses are left out in the fields through all the cold. Would be arrested back in Pennsylvania for this."

Bank Books as Gifts.

A new way to give your gifts on Christmas is to open bank accounts and present the bank books. You can open an account with one dollar and the pass book will be issued in the name of the person for whom the gift is intended. The account will draw interest, the money is safe and the account may be increased as a personal reminder of your gift. The Citizens National Bank, 135 Pittsburg Street, Connellsville. Adv.

PATRONIZE THOSE WHO ADVERTISE!

Bothered by Catarrh, Bronchitis, Asthma, Head or Chest Colds

Try the New External Treatment—Relieves by Inhalation and Absorption. No Stomach Dosing.

For years we have been dosing ourselves to cure cold troubles despite the fact that vapor treatments are quicker and do not disturb the stomach. The trouble has been that the old methods of administering these vapors such as vapor lamps, etc., were very cumbersome. Vick's "Vapo-Rub" Croup and Pneumonia Salve contains Menthol, Thymol, Eucalyptol, Camphor, and Pine Tar, combined by a special process, so that they are vaporized when Vick's is applied to the heat of the body. These vapors open the air passages, loosen the phlegm, and heal the inflamed mucous membrane.

For Catarrh and Head Colds melt a little in a spoon and inhale the vapors. Also apply well up the nostrils. For Asthma and Hay Fever follow the above instructions and also rub well over the spinal column, thus relaxing the nervous tension. For Bronchitis, Sore Throat, and deep chest colds, apply well over chest and throat, first opening the pores by applications of hot wet towels. Then cover with a warm flannel cloth, leaving the covering loose around the neck so the vapors arising may be inhaled all night long. In addition Vick's is absorbed through the pores, taking out the tightness and soreness. Three sizes—25c, 50c, and $1.00.

The European war has opened a wide market for American products, and the American producer is reaping the harvest. The New Haven Railroad.

BY GEORGE FITCH,

Author of "At Good Old Siwash"

The New York, New Haven & Hartford railroad is an octopus which is now in a distended and unhealthy condition as a result of its efforts to swallow New England and wash it down with the ocean adjoining.

The New Haven as it is familiarly known originally ran from New York to New Haven. It was gradually extended to Boston and all other points on the map of Southern New England. Sometimes it extended by building new lines and sometimes by catching an old line asleep and kidnaping it. After it swallowed all the railroad lines in Southern New England it reached out and deftly appropriated the trolley lines. Then it bought the navigation companies which competed with it. Then it reached northward and gathered in the Boston & Maine which controlled the other half of New England. By this time it had a perfect monopoly and the New England citizens who didn't like the way it ran its trains was at perfect liberty to walk. And just about this time the financial doctor was called in.

The New Haven railroad is still very sick and the doctors shake their heads. It is suffering from too much security. It paid for all its purchases of competitors in these securities and it now owes about $150,000,000. The government has recently performed an operation, removing the Boston & Main, the steamship lines and some other incumbrances but no way has yet been found of removing the money from the smooth gentlemen who unloaded their railroads onto the guileless directors at double price.

"It earned $60,000,000 during the last fiscal year but the stockholders got a few kind words for theirs."

The New Haven system is one of the finest systems in the country. It has only 2,000 miles of lines but they are double, triple and quadruple tracked and many miles of the main section are operated by electricity. Its trains run into a forty-acre palace depot in Boston and a quarter section roofed over in New York and it is building a bridge across Hell Gate which will be one of the sights of the world. It earned $60,000,000 during the last fiscal year but after the gentlemen who had sold it its various properties had taken their share, the stockholders got a few kind words for theirs.

The great New Haven system was pieced together by Mr. J. P. Morgan with Charles S. Mellen as an accomplice. Fourteen of the directors who helped on the job are now under indictment, but Mr. Morgan with his usual good luck is dead.
